---

## Professional Summary (专业总结)

A highly motivated and skilled **Developer** with **3+ years of experience** in designing and developing **fast, secure, and scalable web & mobile applications**. Familiar with **modern frontend technologies (React.js, Vue.js, TypeScript)** and **backend development (Node.js, Django, Flask, PHP)**. Strong expertise in **building RESTful APIs, real-time applications, and cloud-based deployments (AWS, Docker)**. Experienced in **problem-solving, debugging, and optimizing system performance** to create efficient and high-performing applications. Passionate about **creating user-friendly interfaces, improving user experience, and working in collaborative environments**. I have experience in **server management, AI-based chatbot development, and automation**. Always eager to **learn new technologies, adapt to industry trends, and contribute to innovative projects** that make a meaningful impact.

---

## Certifications & About Languages (认证与语言能力)

- ✓ Microsoft Office Certification
- ✓ Fluent in **English, Urdu, Chinese (Basic)**

---

## Education (教育背景)

### Diploma in Software Technology (2022 - Present)

Dual Degree diploma in which TEVTA collaborates with Tang International Education

### Institutes:

2 Years in Govt. College of Technology (GCT PGA), Lahore, Pakistan

Continue 3rd Year in Shenzhen Institute of Information Technology (SZIIT), Shenzhen, China

### Matriculation in Computer Science (2020 - 2022)

Govt. High School Attok Awam, Lahore, Pakistan

---

## Work Experience (工作经验)

### RJ Tech Solutions (2022 - 2024)

- **Developed** dynamic web applications using **React.js, Tailwind CSS**.
- **Designed backend architectures** with **Java, Node.js**.
- **With a development team** implementing **real-time features** (WebSockets).
- **Enhanced SEO & performance**, boosting organic traffic by **40%**.

### Work-Study Program (2024 - Present)

- Worked on multiple **hands-on development projects** assigned by instructors.
- Developed a **Rain Class clone**, replicating its core functionalities and UI/UX.
- Gained practical experience in **frontend & backend development**, enhancing coding efficiency.
- Collaborated with peers to **debug, test, and optimize** project performance.
- Improved understanding of **software engineering principles** through real-world applications.

### Project Trainings (Spring Festival, China)

#### 1. Server Management & User Dashboard Project

- Learned about servers.
- Developed a User Dashboard with functionalities like user registration, login, password management, and "forgot password" feature.
- Gained practical experience in backend development and user authentication.

#### 2. AI-Based Chatbot Development

- Learned about AI concepts and their applications in software development.
- Developed a Chatbot with functionalities like tracking the username of the person you are talking to and providing relevant responses.
- Gained hands-on experience in AI integration and natural language processing.
